TRACTORCO NEW RANGES OF MACHINES 2020

TRACTORCO is introducing the **JF SILO MASTER FORAGE BAGGER** and **JF 9000 FORAGE WAGON** which are ideal partners. Together with the JF forage harvester, they are a complete silage making system.

JF SILO MASTER FORAGE BAGGER is the answer to effective silage making for medium to large scale production. The length of the bag can be adjusted according to the amount of silage required. Small amounts can be bagged and sealed separately and silage can be fed daily with less spoilage. This system produces high quality silage and higher production per hectare. There are losses of only 2% inside the bag versus up to 20% in traditional systems. Therefore less land is needed for the same output of silage. The JF Silo Master Forage Bagger requires tractor of at least 80 horsepower with PTO at 540 rpm.

Bag Features and Specification:

- Capacity 50 to 90 tonnes
- Diameter 1.83 meters, Length 60 meters
- Fill rate up to 25ton/hr.
- Blade pushes material into the bag under pressure
- The density of material can be adjusted
- UV protected silage bag- will last up to 2 years
- Ideally situated on hard standing such as concrete
- Conveyor folds for transport

JF 9000 FORAGE WAGON has a reversible discharge mechanism which means that it can be changed from side discharge to rear discharge quickly and easily.

FEATURES:

- For side discharge the moving floor takes material to the front of the wagon where the auger will discharge through a small door at the side.
- Side discharge can be used to bag silage or to transport forage directly to feeding troughs
- The moving floor can be reversed to move the load to the rear of the wagon where it can be discharged through the fully opening rear door in approx. 2 minutes for emptying into a silage pit ideal for filling silage pits.

TRACTORCO SEMINAR AND TRAINING

TRACTORCO president, Mr. David Lockhart conducted a seminar and hands-on training on the newly arrived JF Silo Master Forage Bagger and JF 9000 Forage Wagon for Tractorco staff so that we can provide the best quality of service to our valued customers all over the Philippines.

TRACTORCO team went to Laguna Philippines to conduct training on the newly sold JF Silo Master Forage Bagger and JF 9000 Forage Wagon to make sure that the operators know how to operate the machine before we hand it over to them.

FIELD DEMONSTRATION

Actual pictures during the demonstration of newly purchased JF Silo Master Forage Bagger and JF 9000 Forage Wagon in Laguna Philippines.

MACHINE OF THE MONTH!

WOOD CHIPPERS

[CLICK HERE FOR THE VIDEO OF ORANGE WOOD CHIPPER](#)

[CLICK HERE FOR THE VIDEO OF RED WOOD CHIPPER](#)

FEATURES:

- Can chip 4 inches diameter wood
- Powered by a tractor - at least 60 horsepower with PTO at 540 rpm
- It has hydraulic feeder which feeds logs smoothly to lower the power requirements and to prolong the life of blades
- Low maintenance costs

BENEFITS:

- The chips are excellent at creating compost for your farm or for bio-fuel.
- Capable of converting large, heavy trees into small chips.
- One man operation - saves time and labor costs compared to manual chopping
- Very simple and easy to use

FEATURES:

- It can chip 8 inches diameter wood
- Powered by a tractor - at least 80 horsepower with PTO at 540 rpm
- It has hydraulic feeder which feeds logs smoothly to lower the power requirements and to prolong the life of blades
- Low maintenance costs
