PERFECT MACHINE FOR MIXING DIETS FOR LIVESTOCK!

WHAT IS TMR?

- The TMR MIXER (Total Mixed Ration) evenly mixes all the nutrients needed for livestock feed.
- It can mix different ingredients such as Forage crops, Grains, Protein Feeds, Minerals, Vitamins and Feed Additives.
- The TMR MIXER provides total control and accuracy over the amount of each ingredient used.
- Using a TMR that's correctly balanced for your cows can increase milk production 1 to 2.5L/cow/day.

DIET MIXER FEEDER / TMR WORKING IN *LUZON AND MINDANAO*

TRACTORCO supplied TMRs in **Luzon and in Mindanao** for Livestock feeding. One of TRACTORCO'S regular clients has 3 units of this TMR; 1 small unit and 2 big units for their 1000 cow herd. According to them, the Fimaks TMR has become the most important machine for their livestock operation.

BENEFITS OF DIET MIXER FEEDER / TMR

- Improved feed efficiency
- Increased feed utilization - 4% increase can be expected compared to conventional feeding of forage and grains fed separately
- Increased Milk production up to 5% higher with TMR, compared to conventional ration
- Decreased incidence of digestive and metabolic problems
- Accuracy of the given mixed ingredients compared to feeding ingredients separately
- Reduced labor costs
- Less feed waste - blending all the feeds together in a TMR can mask the flavor of less palatable feeds
- Less sorting. With proper mixing, the cattle cannot pick out the most palatable food and leave the less palatable. So each cow receives a uniform diet.

MIX YOUR LIVESTOCK FEEDS IN JUST 15 MINUTES!

- Mixes different ingredients for feeding to cattle, sheep, pigs, chickens or goats
- Durable and efficient
- **Easy to operate – it ensures a perfect mixture in 15 minutes**
- Operated by electric motor with low power requirement
- Mixes different kinds of dry products such as sorghum, corn, minerals, ground corn, soya bean meal, wheat and rice
- There are 3 models of feed mixer; **300kg, 500kg, 1000kg**

TWO IN ONE MACHINE- CHOPPING FORAGE AND GRINDING SEEDS

- Capacity from 50 kg - 5 tonnes per hour
- Dual purpose: can chop green forage or grind grains
- Optional cyclone makes it easy to bag ground material
- Available with options base for electric motor, diesel or gasoline engine or with PTO for Tractor
- Required Horsepower from 2 HP up to 20 HP, depending on the model

QUALITY CASSAVA PLANTER AND CASSAVA HARVESTER

DOUBLE ROW CASSAVA PLANTER with Fertilizer Applicator

This is the ideal machine for cassava planting. Two rows are planted at once, each planting mechanism has special knives that cut the stalks to uniform lengths and places them evenly along the rows. The spacing of the cut billets along the rows is adjustable giving the optimum plant population for different soil types. It has the additional advantage of 250kg capacity fertilizer applicator, made of durable polyethylene, so that fertilizer can be applied in the same operation.

[CLICK HERE FOR THE VIDEO OF CASSAVA PLANTER](#)

SPECIFICATION:

Number of Rows	2
Planted per day	5-7 hectares
Row Spacing	800 mm – 900 mm
Working Width	2700 mm
Power Requirement	80 HP

ADVANTAGES:

- Increased precision and quality of planting
- Reduction cost of manpower
- Even depth for faster germination
- Quality of planting leading to higher yields

CASSAVA HARVESTER / UPROOTER

SPECIFICATION:

Weight	340kg
Required power	80hp
Average yield/day	3-4 hectares

ADVANTAGES:

- Works on soils in which is not possible to harvest cassava manually
- Save time and labour
- Lower maintenance and harvesting costs.

ROTARY DRUM MOWER

Rotary Drum Mower is designed to harvest grasses like Alpha-Alpha, Mombasa, and Mulato. It has a two drum rotors rotating reversely to each other to make a windrow ready for collection. It has an adjustable cutting height. The power requirement of this machine is at least 50 horsepower.

TECHNICAL SPECIFICATIONS	T-TCBM 165
Machine Code (Order Number)	20401204
Working Width (mm)	1630
Transport Width (mm)	1518
Transport Length (mm)	3185
Overall Height (mm)	1075
Number of Drums	2
Number of Blades	6
Optimum Working Speed (km/h)	5-7.5
Capacity (da/h)	6.5-10
Machine Weight (kg)	422
PTO Shaft Rotations (max)(min-1)	540
Required Tractor Power (HP)	50

ROTARY SLASHER

[CLICK HERE FOR THE VIDEO OF ROTARY SLASHER](#)

TECHNICAL SPECIFICATIONS	T-TSP SX1800
Working Width (mm)	1776
Overall Width (mm)	1930
Overall Length (mm)	2120
Overall Height (mm)	980
Number of Blades	3
Capacity (da/h)	12-15
Machine Weight (kg)	410
PTO Shaft Rotations (max)(min-1)	540
Required Tractor Power (HP)	60

HEAVY DUTY BRITISH MADE DISC HARROW

RECONDITIONED AND REPAINTED

32 DISC – 24 INCHES DIAMETER

MACHINE OF THE MONTH!

JF C120 PRECISION FORAGE HARVESTER

[CLICK HERE FOR THE VIDEO OF JF C120 FORAGE HARVESTER](#)

- Made in Brazil with the capacity of **30 tonnes per hour**
- It harvests **2 rows of corn** at a time – row independent
- The 1 meter wide mouth is ideal for harvesting sugarcane or tropical grasses like Napier which spread out of their rows – **it can cut crops in any direction**
- The simple, strong transmission **ensures long life and low maintenance**
- It produces a high output in spite of the low power requirement from **80 horsepower for corn, sorghum** and **100 horsepower for Napier**.

TRACTOR FILTERS

TOP TIPS!!!

DID YOU KNOW THAT? Changing your filter regularly will save time and money?

WHY? Here is the list of benefits;

- ✓ Prolonged engine life – the air filter traps the dirt and other debris that can cause wear to your engine. The actual size of the debris might be quite small but even those as small as a grain of sand can significantly damage the engine over time, with the potential for damage to pistons, rings and cylinder linings.
- ✓ Improved performance – clogged filters can have a significant, harmful effect on how your engine runs, hampering performance and reducing power output leading to a lowering of operator work-rate
- ✓ Lower emissions – because the air-fuel mix is finely calibrated, failing to maintain your filter will cause an imbalance and less efficient fuel use, contributing to greater emissions

REPLACEMENT FILTERS SUITABLE FOR
MASSEY FERGUSON, JOHN DEERE, FORD
NEW HOLLAND, CASE IH AND LANDINI

AIR FILTER OUTER
FROM PHP 1,771.80

ENGINE OIL FILTER
FROM PHP 441.83

AIR FILTER INNER
FROM PHP 1,387.39

HYDRAULIC FILTER
FROM PHP 2,802.52

FUEL FILTER
FROM PHP 204.91

Php
5,494.91

FUEL FILTER FUNNEL:

- ✓ Removes water, dirt and debris from gasoline, diesel, heating oil and kerosene.
- ✓ Anti-static
- ✓ Self-cleaning
- ✓ No replacement parts
- ✓ Prevents damage to your rotor head and injection pump.
